

# ARSLAN MUHAMMAD

## JR FULL STACK DEVELOPER (LARAVEL & NEXT.JS)

### PROFESSIONAL SUMMARY

I am a Jr. Full Stack Developer with practical experience in React.js, Next.js, Laravel, and WordPress. I build clean and responsive web applications that provide a great user experience. I have worked on both frontend and backend development, including login systems, APIs, and databases. I'm a quick learner and problem solver who enjoys working with teams and always looks for ways to learn and improve.

### SKILLS

- HTML, CSS, JS
- Php
- Laravel
- Wordpress
- Next.js
- React.js
- Tailwind CSS
- MySQL

### PROJECTS

#### Next Mart

- A modern e-commerce platform built with Next.js and Laravel, designed for fast, responsive, and smooth online shopping. It focuses on user convenience, product management, and secure data handling using SQL for database operations.

#### Traffic Checker

- Developed a web app that analyzes website traffic, showing visitor count, sources, and engagement insights. Integrated Similarweb API and HighCharts for interactive data visualization using Next.js.

#### Pixel Forge

- An AI-powered web app that converts text prompts into creative and high-quality images. Built with Next.js and integrated Rapid API for AI image generation. Focused on clean design and a simple user interface.

#### New York Times Web App

- Created a dynamic web application that connects to the New York Times API to display books, top stories, and articles. Designed with Tailwind CSS for a responsive layout and smooth navigation.

### EXPERIENCE

Laravel & Next.js Developer

**NextTech Solutions** – Rawalpindi, Pakistan

May 2025 – Present (On-site)

Develop and maintain full-stack web applications using Laravel and Next.js. Focus on building responsive frontends, secure backends, and integrating APIs for better performance. Write clean, efficient code and ensure smooth and reliable deployment processes.
